

# Inam Ullah

## JavaScript Developer

[inaam040@gmail.com](mailto:inaam040@gmail.com)

**LinkedIn:** <https://www.linkedin.com/in/inaam-ullah-579418161/>

**Portfolio:** <https://inamullah.com/>

## PROFESSIONAL SUMMARY

Senior Software Engineer with 4+ years of experience specializing in full-stack development using React.js, Next.js, Node.js, and Firebase. Proven success in building scalable SaaS platforms, responsive UIs, and secure backend architectures. Experienced in leading teams, delivering performance-optimized apps, and integrating real-time features.

## SKILLS

**Frontend:** JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Material UI, ShadCN, Chakra UI, SCSS, Bootstrap

**Backend:** Node.js, Express.js, Firebase (Auth, Firestore, FCM), MongoDB, REST APIs, GraphQL

**State Management:** Redux Toolkit, Zustand, Context API, React Query

**Testing:** Jest, React Testing Library, Cypress

**Tools & DevOps:** Docker, Git, Postman, Bitbucket, Jira, Trello

**Others:** Role-Based Access Control (RBAC), SSO, Cloudinary, ChatGPT Integration, Monorepo Architecture

## ACHIEVEMENTS

- Successfully led a team of 10 developers on multiple enterprise-grade projects
- Refactored a legacy codebase to TypeScript, improving maintainability and reducing bugs by 35%
- Cut page reload time by 60% via SSR, lazy loading, and UI optimization.
- Implemented role-based access and custom SSO systems across 3 major applications
- Delivered high-performance dashboards and simulations used by international clients
- Built and deployed a complete investment platform from scratch (Capital M), handling multi-user auth and dynamic reporting

## PROFESSIONAL EXPERIENCE

**Versatile Synergy, Dubai, UAE** - Senior Software Engineer - Remote

JULY 2023 - PRESENT

- Developed SEO-friendly apps using Next.js with SSR, ISR, and dynamic routing
- Integrated Firebase for authentication, real-time data sync, and cloud functions
- Built fully responsive interfaces using Tailwind CSS and ensured cross-device compatibility

- Integrated OpenAI's ChatGPT API for natural language-based user interactions
- Led feature planning and architecture discussions with remote product teams

### **ILI Digital, Lahore, Pakistan** - *Senior Software Engineer*

DECEMBER 2022 - JUNE 2023

- Refactored enterprise codebases from JavaScript to TypeScript, improving performance and maintainability
- Built and maintained scalable REST APIs in ExpressJS with MongoDB
- Implemented secure authentication, RBAC, and custom SSO mechanisms
- Collaborated with design teams to deliver highly customized UIs using Ant Design and Chakra UI
- Supervised a team of developers, reviewed code, and managed release cycles

### **ILI Digital, Lahore, Pakistan** - *Software Engineer*

NOVEMBER 2020 - DECEMBER 2022

- Built custom dashboards, simulation tools, and marketing websites from scratch
- Translated Adobe XD/Figma designs into responsive web apps
- Maintained application state using Redux, React Query, and Context API
- Worked with React Hook Form and Formik for efficient form validation and management
- Developed modules using SCSS, Tailwind, and Bootstrap to ensure UI consistency

## **KEY PROJECTS**

### **Capital M - Investment Platform (Next.js, MongoDB, Shadcn, Tailwind CSS)**

- Revamped platform to boost performance, scalability, and code maintainability
- Refactored forms using React Hook Form + Zod with dynamic validation and field control
- Modularized codebase for reusability and cleaner architecture
- Enhanced UI with Shadcn UI, Tailwind CSS, and lazy loading for better UX
- Implemented media uploads via Cloudinary with previews using FormData
- Built rich text editor with Tiptap supporting HTML and image embedding
- Enabled real-time alerts using FCM and backend event triggers
- Optimized APIs with MongoDB lean queries and structured routing
- Integrated email workflows using Brevo + Firebase Functions

### **HRMS - Human Resource Management System (MERN Stack)**

- Designed modules including employee directory, payroll, leave, and attendance systems
- Developed backend services with Express.js and MongoDB
- Integrated Apex Charts for analytics and Redux Toolkit for API/data flow

### **Volksbank (FutureCare, VDS) (React, Redux, Material UI)**

- Developed family inheritance tree using Balkan App with custom node manipulation
- Implemented multilingual translation with dynamic locale switching
- Designed and enforced complex RBAC and permission logic with nested structures

## EDUCATION

### University of Engineering and Technology, Lahore

BS Computer Science (2016 - 2020)

## LANGUAGES

- English (Fluent)
- Urdu (Native)
